PROFESSIONAL SUMMARY

Full-Stack Software Engineer and AI/ML Engineer (B.Tech CSE, VIT Bhopal, CGPA: 8.70) with strong fundamentals in Data Structures, Algorithms, and Object-Oriented Design, and hands-on experience building scalable, production-grade web applications and intelligent systems using React.js, Next.js, TypeScript, Node.js, Python, TensorFlow, and OpenCV. Skilled in RESTful API design, System Design, database management, CI/CD pipelines, and Agile/Scrum workflows across 15+ real-world projects with end-to-end ownership from architecture to deployment. Published Patent holder (Indian Patent Office) and Smart India Hackathon 2025 National Runner-Up. Solved 750+ LeetCode problems (Rating: 1376) and holds an 847 Codeforces rating, reflecting strong applied algorithmic problem-solving.

WORK EXPERIENCE

Project Admin & Open Source Contributor | GirlScript Summer of Code (GSSOC)

May 2024 - Aug 2024 | Remote

- Owned end-to-end feature development across 5+ open-source repositories using React.js and Node.js, from requirements analysis and design through implementation, testing, and deployment, shipping production-grade full-stack modules; ranked #64/1000+ contributors (top 7%) by code volume and review quality.
- Mentored 100+ junior contributors through structured code reviews, enforcing REST API design standards, Git branching workflows, and documentation best practices, improving PR merge quality across the team.

Tech Team Lead, Blockchain Club, VIT Bhopal

Oct 2024 - Present | Bhopal, Madhya Pradesh

- Architected and deployed 2 production web applications using React.js and Ethers.js; implemented automated build-test-deploy CI/CD pipelines on Vercel, reducing manual deployment effort by 40% and deployment time from 15 minutes to under 5.
- Led a 10-member technical team, driving sprint planning, code reviews, and upskilling in Blockchain and full-stack development; delivered 3 club projects within deadline.

PROJECTS

1. Vasudha (SIH '25 Runner Up) | React.js, Node.js, Blockchain, AI, Mobile App | Vasudha-dahd.app

- Architected a national-level full-stack digital ecosystem serving 6 stakeholder roles for AMU & MRL monitoring, competing against 1200+ teams to secure SIH 2025 National Runner-Up.
- Designed and implemented a Smart MRL Engine using interval-based date computation algorithms to calculate drug withdrawal periods and enforce digital locks on non-compliant sales.
- Integrated Blockchain traceability across 6 stakeholders to create immutable records, linking prescriptions to retail dispensing.

2. Smart Flow Traffic Management (Published Patent) | Python, OpenCV | ML Model Development | Smartflow-traffic-management

- Engineered an AI-powered real-time traffic system using OpenCV and Python, applying object tracking and queueing algorithms to achieve 92%+ vehicle detection accuracy across multi-lane tracking with sub-200ms inference latency.
- Designed and trained a TensorFlow deep learning model for traffic flow forecasting, improving lane clearance prediction accuracy by 30% over baseline heuristic methods.
- Constructed a full-stack monitoring dashboard with a Flask API and a React.js frontend to visualize live traffic data.

3. GitHub Readme Tech | Next.js, Node.js, Express.js, TailwindCSS | Full-Stack Developer | github-readme.tech

- Built and deployed a full-stack SaaS web application using Next.js and TailwindCSS, enabling developers to generate customised, production-ready GitHub README files through a component-based interface; scaled to 400+ active users.
- Built a reusable, component-based templating system for dynamic README generation, optimising performance and reducing creation time.

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, JavaScript, SQL, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Next.js, TypeScript, Node.js, Express.js, TensorFlow, NumPy, Pandas, OpenCV
- **Databases:** MongoDB, MySQL
- **DevOps & Cloud:** Git, GitHub, Microsoft Azure, AWS, Vercel, CI/CD
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design, Design Patterns
- **Tools & Concepts:** REST APIs, Power BI, Figma, OAuth, Microservices, Unit Testing, Agile/Scrum, SDLC

CERTIFICATIONS

AWS Certified Cloud Practitioner AWS	May 2026
Oracle Cloud Infrastructure 2025 Data Science Professional Oracle	Sep 2025
Ethnus MERN Fullstack Ethnus	Jul 2025
Azure Data Fundamentals (DP-900) Microsoft	Jun 2025

EDUCATION

B.Tech in Computer Science – VIT Bhopal University	CGPA: 8.70 / 10.00 Aug 2023 – Present
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, System Design	
Class XII – Christu Jyoti Convent School (CBSE), Ujjain	Percentage: 82.4% May 2023
Class X – Christu Jyoti Convent School (CBSE), Ujjain	Percentage: 85.8% Apr 2021

COMPETITIVE PROGRAMMING & OPEN SOURCE

- Actively compete in algorithmic problem-solving contests on LeetCode and Codeforces; solved 750+ problems (LeetCode Rating: 1376, Codeforces Rating: 847) spanning arrays, dynamic programming, graphs, and trees; 4500+ GitHub contributions across personal and open-source projects.
- GirlScript Summer of Code (GSSoC) 2026, Project Admin & Contributor, managing a web development open-source repository with 500+ contributors; ranked as top project admin in the program based on contribution and review quality.

ACHIEVEMENTS

- Secured a Published Patent (Indian Patent Office) for “A Smart System to Prioritize Lanes to Manage Traffic at Intersection”, an AI-driven real-time computer vision system for dynamic lane prioritization, recognised by the Government of India.
- Smart India Hackathon 2025 National Runner-Up, Created a production-ready full-stack solution for a Government Ministry, competing against 1000+ teams nationwide.

EXTRA-CURRICULARS

- Completed two-week industrial immersion across Bangalore and Chennai tech hubs and a ServiceNow Virtual Internship; gained exposure to enterprise-scale Agile workflows, SDLC, and production engineering practices.
